Career Objective

Driven Computer Science and Engineering student at Patuakhali Science and Technology University, now in my 3rd semester, with a deep passion for frontend development and building practical software. Proficient in Java, C, C++, HTML, CSS, JavaScript, and AutoCAD, with hands-on experience in layout design and frontend project development. Currently learning on the job as a Frontend Developer at EquisaasBd, and committed to growing into a strong, versatile web developer through real-world projects.

Education

Institution	Degree / Group	Result	Year
Patuakhali Science And Technology University	B.Sc. (Engg.) in Computer Science and Engineering	Running	2025-Present
Govt. Keshab Chandra College, Jhenaidah	Higher Secondary Certificate (Science)	GPA: 5.00	2023
Jhenaidah Government High School	Secondary School Certificate (Science)	GPA: 5.00	2021

Experience

Frontend Developer February 2026-Present

EquisaasBd Company | Learning Phase | Present

- Learning frontend development through project-based work.
- Practicing HTML, CSS, JavaScript, and responsive UI design.
- Gaining experience in real development workflow and code structuring.
- Building a strong base for future professional frontend roles.

Projects

CalcLab – Computer Science Tools Platform | [GitHub]

- Developed a web-based platform providing free and accessible tools for computer science students and developers.
- Built interactive utilities for scientific calculations and core computer science concepts.
- Designed a responsive, modern interface to enhance usability across desktop and mobile devices.
- Focused on simplifying technical concepts through practical, user-friendly web tools.

Professional Floor Design Project [GitHub]

- Designed a professional floor layout using AutoCAD.
- Focused on technical drawing, spatial arrangement, and presentation quality.
- Built practical experience in digital design work.

Myntra Clone [GitHub]

- Developed a Myntra clone using HTML and CSS.
- Practiced webpage structure, styling, and UI recreation.
- Improved frontend design and implementation skills.

Campus Lost And Found Management System|core java [GitHub]

- Developed a Java-based application to manage lost and found items on campus.
- Implemented Object-Oriented Programming (OOP) concepts, including inheritance, encapsulation, abstraction, and polymorphism.
- Implemented item management, claim handling, and basic login functionality.
- Used file handling for data storage and retrieval without a database.

Skills & Interests

Programming Languages: Java, C, HTML, CSS, JavaScript,C++
Design Tools: AutoCAD
Frontend Development: UI design, responsive layout, webpage cloning
Other Skills: MS Word,Ms Excel,Ms Powerpoint.

Interests

- Frontend development
- Software development with Java
- AutoCAD-based design
- Real-world project building

Campus Involvement

1.CSE Club, PSTU

- **Member:** Contributing to leadership, event planning, technical activities, and student community development.
- **Programming Bootcamp Coordinator:** Organized and mentored programming bootcamps and contests, promoting hands-on problem-solving among students.

2.PSTU Research Society

- **Member:** Participating in research-oriented activities, academic discussions, and knowledge-sharing initiatives that support analytical thinking and academic growth.

3.PSTU Traveler Society

- **Member:** Engaging in travel-related events, campus activities, and collaborative programs that encourage exploration, communication, and student engagement.
